Screenshot Screensaver ScreenShifter Lite is a screensaver with 6 mini screens, which can be started by clicking on one of the screens. Each of them can be made transparent with the help of a mouse click. After having clicked on a transparent screen, you can move around using the mouse cursor and you can hide it from the screen by clicking again. The transparent screens are fully configurable. They can be resized, moved, rotated and you can add images on them. The screens can be then saved and made ready to show on each start-up of your computer. Another peculiarity of the application is that you can assign each screen to be run automatically or on demand, once the computer has started. You can also configure each screen to be shown or hidden when the computer has started. Screenshot EXPO XTRA is a free software
